MAKING FORM FITTERS'
WORK EASIER

Alphi
Formwork and solutions

Pro-Tools

Alphi's ongoing innovation process is aimed at making work less arduous and reducing repetitive strain injuries. So it was natural for the company to join forces with Leborgne, a company specialised in professional tools for the construction sector to **prevent arduous worksite conditions.**

Of the various ranges offered by Leborgne, Alphi is particularly impressed with the hand tool range, **nanovib®**. The tools in this range are the result of a process conducted with various prevention bodies such as OPPBTP, CARSAT and SIST-BTP, and offers a solution for every professional in the construction sector.

The partnership signed in 2012 between Leborgne, CAPEB and IRIS-ST makes it possible to test tools and ensure the impartiality and objectivity of the results obtained.

Long-range form stripping tool in use

EQUIPMENT

		Formwork hammer	Specific features	Description
Hammers			<ul style="list-style-type: none"> Rounded claw angles 	<ul style="list-style-type: none"> 40% less vibration Steel shaft with high resistance to off-target blows Ergonomic handle Non-slip grip Flared handle end to prevent slippage Magnetic nail holder Lateral hammering surfaces Sharp top edges
		1-tooth carpentry hammer	Specific features	
			<ul style="list-style-type: none"> Straightening lug Hammering surface with 2 rounded angles 	
		Wood-frame house assembly hammer		
				

		Prop key	Specific features	Description
Other tools			<ul style="list-style-type: none"> Eliminates 100% of the noise caused by hammering prop nuts 	<ul style="list-style-type: none"> Universal key for fastening prop nuts, shoring towers Extends the service life of prop nuts Curved handle with cladding
		Long-range form stripping tool	Specific features	Description
			<ul style="list-style-type: none"> Prevents risks of awkward positions and accidents 	<ul style="list-style-type: none"> 1.85 m handle, which does not require the use of a rolling safety ladder The tip is offset with respect to the handle so that the user is not under the plywood panel when it falls.
		Hammer holder	Specific features	Description
			<ul style="list-style-type: none"> Its 45° angle prevents the hammer from falling when the worker crouches down 	<ul style="list-style-type: none"> Universal hammer holder For right- and left-handed use Built-in 100% graphite carpentry pencil

EQUIPMENT

Other tools	Digging bar	Specific features	Description
		<ul style="list-style-type: none"> Insulated up to 1000 V by means of its 100% fibreglass handle 	<ul style="list-style-type: none"> Compliant with BS8020 standard 20% lighter than an all-steel digging bar Forged steel working parts Lifting capacity up to 1.5 tonnes End-of-travel stop preventing hand from coming into contact with metal part of the tool
	Formwork scraper	Specific features	Description
		<ul style="list-style-type: none"> 3 times longer than a conventional scraper Telescopic handle up to 3.50 m 	<ul style="list-style-type: none"> Telescopic handle made of high-strength lightweight hardened aluminium Can be used for scraping at heights of up to 5 m without holding the handle above the rotator cap Automatic adjustment handle Bent blade made of extra-hard hardened steel Rounded edges Bush reinforced with 2 truss frames Replacement head available

ALPHI, THE WORKSITE SAFETY SPECIALIST

The professional tools designed by Leborgne help makework less arduous. The nanovib® range consisting of hammers and prop keys satisfies Alphi requirements in respect of safety, vibration, and noise reduction.
